

Warm-Up: The Painting

Prepared by Mark on January 23, 2025.

Problem 1:

You have a painting on a string.

Hang the painting on two nails so that if either is removed, the painting falls.

You may detach the string as you hang the painting, but it must be re-attached once you're done.

The solution to this problem isn't a "think outside the box" trick, it's a clever wrapping of the string.
